

MANI CHANDAN G

Java Full Stack Developer

 manichandang3@gmail.com

 +1 (226) 387-3734  Brantford, ON  [LinkedIn](#)

Professional Summary

- Java Full Stack Developer with 4+ years of experience driving full-stack software development projects from conception to deployment, proficient in designing, developing, and implementing robust solutions that seamlessly integrate front-end and back-end components.
- Experience in crafting dynamic web solutions using a diverse tech stack including Python, Java, JavaScript frameworks (React.js), backend frameworks (Spring, Django, Node.js), and DevOps tools to cater to unique client requirements.
- Experienced in designing and deploying scalable cloud-based web applications on AWS platforms, leveraging cloud services to optimize application performance and reliability.
- Excellent in Database development with expertise in deploying Stored Procedures, Triggers, and SQL Queries.

Work Experience

JPMC, Canada | Java Full Stack Developer

May 2024 – Present

- Integrated Java code with a React.JS application using Redux framework and Context API, facilitating efficient data management.
- Accomplished microservices using Spring Boot for high scalability and fault tolerance, leveraging REST APIs and RabbitMQ for inter-service communication.
- Facilitated Agile ceremonies to ensure effective communication and alignment within the team, leading to an improvement in project visibility and an increase in team morale.
- Utilized Spring Data JPA's query methods and JPQL to retrieve and manipulate data efficiently, optimizing database performance.
- Leveraged a GraphQL API server using graphql-http library for optimized querying from MongoDB, elevating throughput by 8% and ensuring efficient data transfers between client and server sides.
- Secured Java applications with Spring Security, implementing OAuth2 and JWT authentication and achieving a 25% reduction in vulnerabilities.

Dixon Technology, India | Java Full Stack Developer

Dec 2020 – Aug 2023

- Revamped Java codebase to eliminate global CSRF keys, fortifying defenses against cross-site request forgery attacks. Implemented unit and integration testing to ensure the effectiveness of the security improvements.
- Redesigned and developed the features of Velo application UI in ReactJS from scratch enhancing user experience.
- Executed a seamless integration of CloudAuth for Tier2 service with zero downtime enhancing security and access control.
- Built a highly available and scalable cloud environment (MAWS to NAWS) using AWS EC2 Auto Scaling, S3, RDS, and ElastiCache for the financial services application, delivering a 40% increase in performance.
- Established CloudWatch metrics for CPU and memory utilization, enabling effective resource monitoring and system optimization.
- Boosted application response time by DynamoDB for high-performance NoSQL data access, reducing latency for critical operations. • Led the initiative to resolve Security compliance risks by developing an automated solution that cut manual work by 32%.

Education

PG diploma in Web development | Conestoga college, Brantford, Ontario

Dec 2024

Bachelor of Technology in Computer Science | Teegala Krishna Reddy engineering college, India

July 2023

Skills

-
- **Methodologies & Database:** SDLC, Agile, Scrum, KanBan, MySQL, PostgreSQL, MongoDB, Oracle, Cassandra
 - **Language & Testing:** C, C++, Java, SQL, Python, JavaScript, TypeScript, Postman, JUnit, Mockito, React Testing Library
 - **Frameworks/Libraries:** Spring Boot, Spring MVC, Django, Flask, Apache-Airflow, React.js, Node.js, Express.js, GraphQL
 - **Web Technologies & Testing:** HTML5, CSS3, jQuery, Ajax, JSON, XML, Redux, RESTful API
 - **Cloud:** AWS (EC2, SQS, SNS, RDS, Elastic Beanstalk, Lambda, Code Deploy, CloudWatch), Oracle Cloud
 - **CI/CD and DevOps Tools:** Jenkins, Docker, Kubernetes, Git, Bitbucket, GitLab, RabbitMQ, Kafka, Grafana, IaC, Ansible, Terraform

Certifications

- Java: Advanced Concepts for High-Performance Development
- Java Memory Management: Values and References
- Java Object-Oriented Programming
